

The screenshot displays the pgAdmin 4 web interface. On the left, the 'Servers' tree is expanded to show the 't' database under 'PostgreSQL 12'. The 'Extensions' folder is selected. The main panel shows the 'Query Editor' for the 't/postgres@PostgreSQL 12' connection. The query being executed is:

```

1
2 select training_id from training
3 where DATE_PART('day', AGE(from_date, to_date)) > any(
4 select DATE_PART('day', AGE(from_date, to_date)) from training
5 );

```

Below the query editor, the 'Data Output' tab is active, showing the results of the query in a table:

	training_id [PK] numeric (4)
1	401
2	402
3	404

At the bottom right, a green notification box states: "Successfully run. Total query runtime: 72 msec. 3 rows affected."
